To do so, we are combining the reach of traditional communication tools with the power of social media. The children learned about the role of forests and woods in the CO2 cycle and other uses of forests and wood through activities such as storytelling, physical activities, and the creation of climate-smart crafts. The mascots Ms Smart and Mr Clever present all the activities. As they say: “If you care about the environment, you’ll want to learn more about the climate.”

The initiative offers a wide range of activities addressed at children and adults alike, from scientific conferences, excursions and workshops to climate friendly healthy food – “die umweltberatung”, and the city’s environmental education and the communication of knowledge about climate issues. The key goal is to convey the findings of climate researchers in an accessible way, as knowledge and understanding promotes action and increases awareness about how their daily actions can contribute to combat climate change and mitigate its adverse effects.

CLIMATE PROTECTION AND CLIMATE CHANGE: THE GLOBAL CHALLENGE

The future consequences of climate change depend largely on how much greenhouse gas emissions are reduced by the inhabitants of the world. The efforts made here will influence the temperature that Earth is heading for.

The opening event of this series was a talk given by the Federal Minister of the Environment. "Climate change is an issue affecting everyone, everywhere and at all levels. This issue is very close to our hearts."

"KEEP YOUR COOL IN SUMMER"

In summer, city life is all about the heat. Climate change has a measurable impact on Vienna. Although climate change may seem like an intangible concept that makes people concerned, we can react to it now and in the future, through effective and efficient greenhouse gas emission reduction.

"CLIMATE-FRIENDLY TRANSPORT IN THE CITY"

In this series of events, the climate change challenge in Austria is examined in the context of emissions and urban transport.

"SUSTAINABLE VIENNA"

Climate protection activities are presented. Children love our hands-on activities, and it’s never too early to start raising awareness for our climate.
